

A Native Plant Project Grant provides cost share money to offset the cost of purchasing native live plants or seeds. This project type is ideal for people who want to add native plants to existing landscaping, add native seed to an existing natural area, or create a small project such as a butterfly garden or pocket prairie.

Required Application Materials

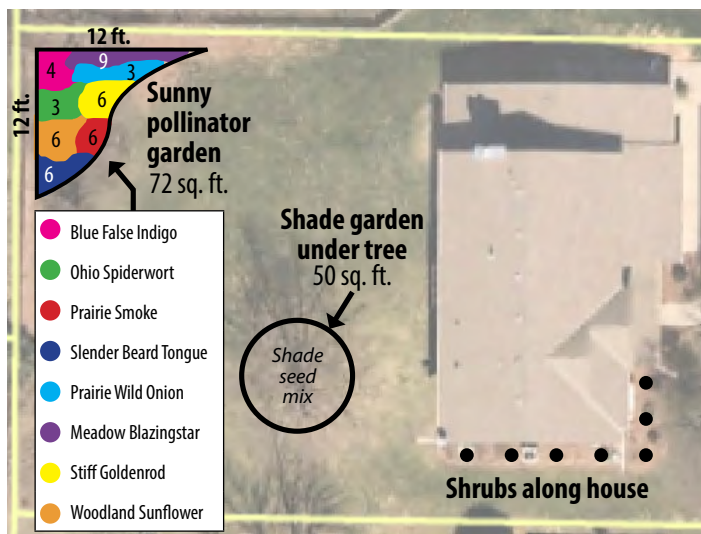

To apply submit an online application including:

1. **Current photos** of your proposed project site.
2. **Site map** that shows project area(s) on your property.
3. **Planting plan** to show what plants will go where. *This may be combined with the site map - see example below.*
4. **Detailed native plant list, source, and costs.**

Read "Stewardship Grant Native Plant Requirements" for plant quantity minimums & other requirements.

Example Project

COMBINED SITE MAP & PLANTING PLAN

A **site map** of your project shows where on your property you plan to install the project. You can create a site map using your county's online property map which allows you to select an aerial image base layer and offers drawing and measuring tools.

A **planting plan** for your project shows where you intend to install the plants from your plant list. This can be separate from or combined with your site map.

LENGTH
X
WIDTH

You should also include dimensions (square feet; length/width) of your project area(s) on the site map, planting plan, and/or application form.

What are Eligible Costs?

Live native plants and seeds are the ONLY reimbursable items for a Native Plant Project grant.

Live plants include actively growing or dormant plants such as bulbs, corms, tubers, and rhizomes.

Labor, mulch, edging, and other materials and services are **NOT eligible for reimbursement** through a Native Plant Project grant.

In-kind contributions are not eligible costs.

PLANT LIST

Common Name	Scientific Name	Bloom	Size Desc.	Price each	Qty.	Total
SHRUBS ALONG HOUSE
